PROFESSIONAL SUMMARY

Chemistry graduate from the University of Oxford with experience in Python, SQL, and data analysis, including machine learning and predictive modelling. Experienced in tax preparation for US expatriates and skilled in statistical testing, data visualization, and communicating complex concepts effectively.

WORK EXPERIENCE

Jaffe & Co

2026–Present

Tax Trainee

- Operating in the niche area of US-expatriate tax
- Researching obscure tax laws to ensure compliance with the IRS and minimising client tax
- Frequently communicating concisely with seniors to avoid delays in workflow
- Utilized tax preparation software to streamline data entry and reduce processing time for client returns
- Maintained organized records of client interactions and tax filings using firm's document management system
- Utilized advanced Excel functions to organize and analyze large datasets for tax planning purposes

Sherpa Tutors

2024–2026

Tutor

- Explaining complex scientific concepts clearly to students of varying ability
 - Planning structured lessons and tracking performance improvements over time
 - Maintaining a 5-star average rating, demonstrating clarity and reliability
-

PROJECTS

Hypothesis Testing

- Applied statistical hypothesis testing to grocery shopping data provided by Data Science Infinity to evaluate the success of advertising campaigns and determine whether observed differences were statistically significant.

Football Data Analysis

- Cleaned and manipulated large datasets of football event data using Python, producing visualisations including passing networks and shot maps to investigate team playing styles and performance.

Football Prediction and Betting

- Developed machine-learning models to predict Premier League match outcomes and compared model predictions with bookmaker odds to identify potential value in the betting market.

EDUCATION

Somerville College, University of Oxford

2025

Master of Chemistry in Chemistry

CORE SKILLS

- Python
- SQL
- Data Analysis
- GitHub
- Tableau
- Excel
- Machine Learning
- Predictive Modelling
