Profile

Chemistry graduate from the University of Oxford with strong mathematical foundations and experience handling complex datasets from mass spectrometry of proteins. Seeking employment in data analytics.

Skills

- **Highly numerate:** excellent grades in A-level Mathematics and AS-Level Further Mathematics, and strong performance in quantitative modules during a Chemistry Degree at the University of Oxford.
- **SQL:** experience querying large relational datasets across multiple tables to extract and analyse sales data.
- **Python:** experience in data analysis using libraries such as pandas, NumPy and scikit-learn.
- **Tableau:** experience building dashboards and visualisations to communicate insights from complex datasets.
- **Project work:** analysed football betting odds in Excel and compared these to outcome predictions from ELO values to explore potential market inefficiencies.

Education

Somerville College, University of Oxford, MChem Chemistry (2021–2025)

- Final Classification: 2.1 (70% average in finals)
- Strong quantitative modules, including spectroscopy, thermodynamics and quantum mechanics

St Thomas More Catholic School and Sixth Form, Nuneaton (2014–2021)

- A levels: Maths A*, Biology A*, Chemistry A*
- AS level: Further Maths A
- GCSEs: 9 grade 9s, 1 grade 6 and 1 grade A^

Experience

Master's Project: Using mass spectrometry to investigate small heat-shock proteins, University of Oxford, Benesch Group (2024 – present)

- Analysis of high-dimensional experimental datasets from UHMR mass spectrometry to investigate protein structure and interactions
- Processing, cleaning and interpreting mass spectra using software such as UniDec

Sherpa Tutors, Tutor (2024 – present)

- Explaining complex scientific concepts clearly to students of varying ability
- Planning structured lessons and tracking performance improvements over time
- Maintaining a five-star average rating, demonstrating reliability and clarity.
